

# GRAND Value Paths™

*Functional Inquiry - Data Focus*

- If you are specifically looking for some type of information or data within a business function, you can navigate directly to the business function based on the type of information or data you are seeking.
- As an example, a user can jump directly into a library of reports, visuals, analytics content, and dashboards that are built specific to various data sources or data points within such business functions as:
  - ❖ Sales and Margin Management,
  - ❖ Working Capital Management (i.e. Inventory, Receivables, Payables)
  - ❖ Financial Management (i.e. Profitability, P&L, Balance Sheet, Cash Flow, General Ledger - GL),
  - ❖ Payroll,
  - ❖ Worker Productivity, etc.

***Functional Inquiry**, as part of our fundamental approach to Decision Making, helps you learn what you don't already know about your Business and institutionalize sound Managerial Decision Making. Utilizing our Strategic and Operational Decision Support System(s), you can navigate through the maze of Business and Operational Complexity; thus, accelerating time to actionable Business Insights and Analytics Content across your organization.*
